Press Release

GRT Rubber Technologies Awarded ISO 9001:2015 Quality Certification

Paragould, AR, December 10, 2018: GRT Rubber Technologies is proud to announce the successful completion of its International Organization for Standardization (ISO) 9001:2015. Registration was certified on November 13th, 2018 by NSF.

ISO 9001 is the standard that specifies requirements for a quality management system and organizations apply the standard to demonstrate their ability to consistently provide products and services which meet customer requirements.

“We are excited to earn this certificate of registration and we think it is an important ‘milestone’ as we continue to strive for continuous improvement” said President David Brown. “We started this process two years ago due to increasing demand for our specialized rubber products and we believe this will be an important ‘step’ to further meet our future growth goals”.

About GRT Rubber
